

ENVIRONMENTAL POLICY STATEMENT

This environmental policy statement has been prepared and adopted by the Directors of Southdowns Environmental Consultants Ltd. The company is committed to the maintenance and improvement of the natural and built environment together with the achievement of sustainable development. The contents of this policy statement also reflect the company's on-going commitment to the provision of high quality technical services which satisfy the needs and requirements of clients in all relevant areas of its work.

The company monitors and is committed to improving its performance in the field of environmental policy for the benefit of its clients and other stakeholders. This programme of continuous improvement is based on:

1. the pursuit and development of methodologies for reporting on and improving the quality of the environment in Southdowns' key areas of expertise;
2. the minimisation and elimination where possible of all negative environmental impacts associated with Southdowns project work;
3. the efficient use of energy, water and other consumables in the execution of project work;
4. the implementation of measures to minimise waste and to encourage recycling;
5. the development of environmental awareness amongst Southdowns' staff and their commitment to environmental improvement;
6. the promotion of the use of environmental best practice by clients, contractors, suppliers and other third parties; and
7. compliance with all regional, national and international environmental standards such as ISO14001 and legislative requirements

Signed on behalf of Southdowns Environmental Consultants Ltd
